Whitcomb's administration of about four thousand dollars per annum and furnishes the items himself. Very well. We have now only time to furnish the amount of one more item (out of several) of this same retrenchment. If the editor will only cast his eye on the single item of the expense of the Legislature in one session, that of 1840, he will find there was appropriated for that object by that same Legislature, forty-six thousand dollars. (And the laws were not revised at that session. The session lasted nearly 3 months. Here then is Democratic retrenchment proven by the Journal's own confessions and by reference to the laws themselves.

When did we ever hear of Whig retrenchment i Indiana? The great mass of Whig farmers and laborers, to be sure, are as fond of retrenchment as the Democrats themselves. But their leaders " who make politics a trade," and never had any other trade understood all this, and they are afraid of Governor together, and boasts of what he will do, if he only or means of living, never gratify them in that Whitcomb's growing popularity in consequence. gets a chance, but then looks round, and whispers his respect. They fasten on the body politic, and like leaches suck out the very life blood. Is it strange then, that enough honest, unprejudiced laboring whigs were found with the help of the democrats, to throw their faithless and selfish leaders overboard in 1843! They have followed it up ever since and the majority they has taken care of their interests, without distinction office. > To make the operations of the army upon Montetey more secure, if not absolutely certain, Gen. Taylor designs occupying the town of Camargo, about 250 miles by water, above Malamoras. To do this securely, it is necessary for him to have transports of a draft suitable to the navigation of the Rio Grande. Camargo will be the basis of his operations upon Monterey, and this point must be first made the depot of supplies, and entrenched in a style capable of sustaining # tiege.

It was the design of Gen. Taylor, as we learn, to be at Monterey by the first of July; but the want of transports to convey his stores to Camargo, has compelled him to delay further progress in the enemy's country till this des ficiency is removed. Camargo is situated upon the Rio Grande, and presents an admirable foundation for a display upon the interior, and from Camargo to Monterey is about 40 leagues, or 120 miles. The schiry lying between that town and Monterey is more forme than that between Matamores and Monterey-collequently it is altogether better for the army to proceed from Camargo upon Monte

He is now in the city of New Osleans, but will prefeed up the river immediately to supply the deficiency in transports which his purchasers here may leave. From the mouth of the Rio Grande to Matamoras vessels drawing four feet water can run without obstruction; above that point up to Camargo, there are not more than three feet water in many places. Steamers of the proper draft can searcely be got in sufficient numbers here to answer the purposes of an invading army, and therefore Captain Sanders will go west to find them:

Before reaching Camargo, the army will have to take the town of Reynosa, which is between Matamoras and Camargo. It is not expected, however, that any defence will be made of such villages,

General Taylor designs now to be at Monterey as soon ad after the separation from Spain-exiled, returned in July as possible. This calculation is based somewhat upon the idea that the United States will order an expedition from the Missourr sine upon the northern provinces. If this be done the whole of North Mexico will be in our possession. Such a disposition of the forces of the United States would end the war at once. But if it did not, our army would hold the key to the whole of South Mexico, and the gates of the espital would, speaking in a military sence, be in the possession of Gen. Taylor.

They had a brush with the rear guard, killing 3, capturing 22, and taking one engon with amunition, clothing, &c. They returned to Matamoras with their prisoners, and we now have them in the Fort. Their horses gave out and obliged them to return. They pursued 66 miles, and from that point for 21 miles there was no water. The enemy held possession of the point and water, with 11 pieces of artillery, and are 4000 strong."

Further from Mexico.

The New York "Courrier Des Estats Unis," has some information from Mexico, by the way of Havana, which has not been published elsewhere. It will be seen that Santa Anna and Almonte await in Havana the progress of events, and expect important results from the yet unsuppressed; and, as they think, significant revolution of Alvarez.

"To complete the list of the disasters with which unbappy Mexico is threatened, our Havana letters of May 26th inform us that the insurrection proclaimed in the South by Gen. Don Juan Alvarez in favor of Santa Anna, and pure republicanism, has not been suppressed, as reported; and that on the contrary. this conflagration is destined to extend over the face of the whole country. Santa Anna watches its progress from the depths of his retreat at Havana, all the while enjoying his cock-fights; and on the day when this skilful player believes that the time has come, he will only have to appear for the power of Paredes to fall into rains, undermined on all sides. Gen. Al-monte remains at Havana, watching events with Santa Anna. In a letter to a person in New York, Gen. Almonte expresses his indignation at the brutal arrest of his secretary, whom, as he says, he sent to Mexico for the purpose of consulting with his gov-
